

# Regional School District 17

FACILITIES STUDY, DEMOGRAPHICS STUDY & MASTER PLAN

Tecton  
ARCHITECTS

## Vision of the Graduate

A graduate of RSD17 School District is a compassionate critical thinker, who collaborates to solve problems, and is prepared to contribute to improving our world.

### The Future of RSD17

Tecton Architects are currently evaluating the physical condition of all existing school facilities, investigating and assessing the viability of alternate land/buildings, and performing a demographic study. All of this will allow us to develop and prioritize a district-wide master plan, which is a plan for the physical sites, and also for teaching and learning over the next 20+ years. Community input is vital in this process and will help keep RSD17 moving forward and improving.

### Project Goal

In collaboration with the community, develop a generational, multi-phase, and economically responsible district-wide master plan that will address capital improvement needs, and teaching and learning needs for the next 20+ years.
